

# ELECTRIC BASS GUITAR 4 AND 5 STRINGS

## NEW HEXAGONAL EXPLOSION LINE

The strings are wound on a hexagonal core with a nickel plated wire.

These 2 technologies associated to a specific production process maximize the sound's specific qualities, brilliant, large overtone spectrum and lead to an optimum flexibility, a fast precise response and great playability.

In addition they offer the special characteristic of a hexagonal core of the highest quality plus a special feeling and comfort.

All strings included in the sets are available as individual strings.

# electric SAVAREZ

**SAVAREZ ELECTRIC** : A 240 years' experience in manufacturing strings for every music instrument. A long experience in the production of steel strings since the beginning of the company led to the creation of the strings used by Django Reinhardt and the invention of ROUND WOUND and Half round POLISHED electric strings.

The high technology production process, the high grade raw material plus the special protecting bag against oxydation guaranty a longer life of the strings, durability of the quality sound and playing.

WITH SPECIFIC ANTI-OXIDATION BAG
